APPROVED OPERATIONAL RUNBOOK: FXT-RUN-005

End-of-Day (EOD) General Ledger Reconciliation Mismatch Runbook

Application: Accounting & Ledger (FXT-Ledger)	**Service:** EOD-Recon-Job / SpringBatch	**Region:** GLOBAL / TOKYO / LONDON / NY
Environment: PROD	**Category:** Batch Processing & Accounting	**Version:** 2.2.4
Owner / Team: Financial Control & Product Control Support	**Last Updated:** 2026-05-11	**Doc ID:** FXT-RUN-005

1. Operational Symptoms & Issue Summary

Issue Summary: End-of-Day batch reconciliation job fails with exit status FAILED due to debit/credit imbalance or missing front-office trade blotter trades, blocking ledger close.

Detectable Symptoms & Alerts:

- Batch Job Status: 'JOB_EXECUTION_FAILED: Step eodLedgerReconStep failed with ImbalanceException'
- Error: 'Reconciliation mismatch: Front Office total ($4,120,590,120) != Back Office total ($4,120,410,120), delta = $180,000'
- Alert: 'EOD_LEDGER_CLOSE_BLOCKED: Accounting date 2026-10-01 cannot be marked FINAL'
- Operations symptom: Finance team cannot generate regulatory balance sheet files

2. Root Causes & Technical Diagnosis

- Late trade amendments booked after EOD trade snapshot was captured.
- Cross-currency FX swap leg booking failed due to exchange rate rounding discrepancy.
- Duplicate trade cancellation record created by Front Office manual ticket override.

3. Mandatory Safety Directives (DO NOT DO)

CRITICAL OPERATIONAL WARNING: **DO NOT manually force job status to 'COMPLETED' in BATCH_JOB_EXECUTION table without balancing the ledger delta; this constitutes regulatory audit violation.**
CRITICAL OPERATIONAL WARNING: **DO NOT run the EOD purge script until the reconciliation mismatch is resolved and verified.**
CRITICAL OPERATIONAL WARNING: **NEVER update general ledger balances directly via raw UPDATE statements without audit logging.**

4. Step-by-Step Resolution Procedures

Step 1: Identify Unbalanced Book and Currency Pairs

Execute approved SQL query to pinpoint which book and currency pair generated the delta.

Command (SQL):

```
SELECT book_id, ccy_pair, fo_total, bo_total, (fo_total - bo_total) AS delta FROM
t_recon_mismatch WHERE accounting_date = TRUNC(SYSDATE) ORDER BY ABS(delta) DESC;
```

Step 2: Identify Missing or Late-Booked Trades

Compare trade snapshot timestamp against actual trade booking timestamps in core table.

Command (SQL):

```
SELECT trade_id, book_id, ccy_pair, notional, booking_time FROM t_trade WHERE booking_time >
(SELECT snapshot_time FROM t_recon_control WHERE accounting_date = TRUNC(SYSDATE));
```

Step 3: Trigger Incremental Trade Snapshot Ingestion

Run batch tool to absorb late trades into the recon staging schema.

Command (PowerShell):

```
& 'C:\FXT\Batch\bin\run_recon_ingest.bat' -date (Get-Date -Format 'yyyy-MM-dd') -mode
INCREMENTAL
```

Step 4: Restart Failed EOD Batch Step

Restart the Spring Batch job from failed step using standard job operator command.

Command (Bash/Shell):

```
java -jar /opt/fxt/eod-batch/recon-runner.jar --job.name=eodLedgerReconJob
--restart.execution.id=84021
```

5. Post-Recovery Verification Procedures

V-1: Check t_recon_control: status must show 'RECONCILED_BALANCED' and delta = 0.00.

V-2: Verify Spring Batch exit code is COMPLETED (exit_code = 'COMPLETED').

V-3: Confirm notification email 'EOD Accounting Close Successful' sent to Finance Distribution List.

6. Dependency-Aware Service Recovery Sequence

Ordered Sequence:
1. Database Lock Check on Staging Tables
   ➔ 2. Incremental Late Trade Ingestion
   ➔ 3. Ledger Discrepancy Re-computation
   ➔ 4. Spring Batch Step Restart
   ➔ 5. EOD Ledger Close Finalization

Explicit Stop/Escalate Gate: If discrepancy delta remains non-zero after incremental ingestion, STOP. Do not force close. Escalate immediately to Financial Controller on duty.

7. Edge Cases & Escalation Protocol

- **Edge Case:** Month-end multi-currency revaluation discrepancy: Requires Product Control adjustment ticket.

- **Edge Case:** Cancelled trade resurrected by automated retry: Quarantine trade ID via recon exception portal.

Primary Contact: Finance Operations / Product Control On-Call (product-control-oncall@fxtrading.internal | Phone: ext. 7100)	**Secondary / Bridge:** Core Accounting IT Team Lead (accounting-tech@fxtrading.internal)
Severity / SLA: P2 High: 45-minute resolution SLA (before 22:00 regional close)	**Escalation Condition:** Discrepancy exceeds $100,000 or persists within 1 hour of regulatory reporting deadline.
